## **HEY, I ACTUALLY LEARNED SOMETHING BY READING MY SCIENCE TEXTBOOK!!**

1. **A picture is worth a thousand words. Look at the pictures and illustrations, and read the captions. Then answer these questions:**
  - a. I'll bet you learned something just by looking at the pictures. What did you learn?
  
  
  
  
  
  
  
  
  
  
  - b. Based on the pictures, tell what you think this section is about.
  
  
  
  
  
  
  
  
  
  
  - c. Pictures don't tell everything you need or want to know. Come up with 2-3 questions not answered in the pictures.
  
  
  
  
  
  
  
  
  
  
2. **They put it in bold for a reason. Go through the reading assignment and copy down the headings and entire sentences with any bold words. Do this in order from beginning to end.**

3. **It's not called reading for nothing.** Read your assignment. Add more detail into your notes.

4. **Key Ideas.** Find the Study Guide in the Chapter Review at the end of the chapter. Copy the "Key Ideas" for this section.

5. **Don't stop yet there is plenty more to learn.**

a. What did you find most interesting in this section? (Nothing is not an acceptable answer)

b. What questions do you still have? Are there still things you aren't sure about or something that you'd like to, or should, know more about?

c. Where can you learn more? Be specific in naming resources.

6. **Self-evaluation:** Create a test for yourself, flashcards, word problems, or complete questions from the book. If you are unsure of the answers or need to look them up --- study more.
